

Unleash the Power of Microsoft Dynamics 365 Business Central

Optimize your business operations, increase productivity, and drive growth with Microsoft Dynamics 365 Business Central, a cloud-based suite of ERP and CRM applications designed for modern businesses. Connect sales, service, finance, and operations for comprehensive business management.

End-to-End Visibility

Gain a holistic view of your business processes, from finance to customer service. Make data-driven decisions and streamline operations with real-time insights.

Seamless Integration

Integrate with Microsoft applications like Office 365 and Power BI for collaboration, reporting, and analytics. Break down information silos in a unified platform.

Scalability & Flexibility

Business Central grows with you, whether you're a small business or an enterprise. Easily adapt to changing needs, add functionality, and expand effortlessly.

Financial Management

Gain control over your financials with tools for budgeting, cash flow management, and automated reporting. Stay compliant and optimize your financial processes.

Inventory Optimization

Achieve greater efficiency in inventory and supply chain management. Streamline procurement, minimize stockouts, and automate reorder points.

Intelligent Insights

Leverage AI and machine learning for deeper insights into customer behavior, demand forecasting, and sales trends. Drive personalized marketing campaigns and stay ahead of the competition.

Mobile Accessibility

With cloud-based technology, access critical business data anytime, anywhere. Stay connected and make informed decisions on the go.

After assessing your existing systems and processes, our expert consultants will determine the optimal implementation approach for Microsoft Dynamics 365 Business Central.

Why CIT?

Real support goes beyond implementation.

We'll ensure a smooth and secure transition from current systems and team practices, streamlining operations and achieving new efficiencies across sales, marketing, customer service, finance, and supply chain.

With decades of experience and a proven track record of success, we possess the Microsoft Dynamics 365 knowledge and consulting expertise to exceed your business and IT goals.

Our Proven Process

Initial Consultation

Our engineers, support staff, and leadership team work closely with you to understand your position, assess your current IT infrastructure, and make crucial decisions with confidence.

Design & Configuration

We engage in a collaborative design process, mapping business processes to Microsoft Dynamics 365 and ensuring seamless integration with existing systems.

Migration & Testing

We'll help move you, your team, and your data from legacy systems to Microsoft Dynamics 365. Together, we can test to ensure total system functionality and reliability.

Go-Live & Implementation

Our specialists will continuously monitor and resolve issues, as well as apply our impressive bank of knowledge to user training and empowerment—all geared toward a smooth transition.

We work in Microsoft daily. We know it inside out and constantly evolve our offerings against its technological evolution. Whether seeking new ways to connect cross-functional roles, boost sales and services, or anything in between, CIT stands ready to achieve business-technology alignment.
